Feverscanner and Passage control

Suitable for all industries and guarantees a fever free environment for your co workers, customers and visitors. This creates the safety needed in todays society.

Advantages

✔ You can be guaranteed that only people without fever will be allowed in the premises.

✔ Your customers/visitors will feel a sence of safety to visit your place

✔ You will be avoding unnessesary sick leave at your office.

✔ You will have an eco nomically defensible tecnique that instantly will be paid off.

The easy way

With the fever scanner you can easily and quickly meassuse the temperature on people. This unit is suitable for all events and places where people get together and gives an answer in seconds if the person has a fever or not.

Face recognission

This unit can also function as a passage controll for ex buisnesses, schools, elderly care, gyms or in public transportation. It can be connected to a register for staff, members or clients.
Face recognisson will then only approve passage for fever free persons with clearance.

Alarm/Monitoring

The alarm can be set in many different ways, fo example with a sound signal or that a picture on the person comes up on an external monitor.
The surveilance could be administered by for example a doorman at the restaurant, security for corporate spaces or ranger at the subway.

Technical specification

CE, FC and ROHS approved, approval number EED32M000861 accordingly to EMC Direktive 2014/30/EU

» Temperature detection with high accuracy
» Touchless tecnique
» Face recognission
» Fast and effective
» Temperature range 30-45° C

» Accuracy +/- 0,3 degrees
» Meassuring range 10-105 cm
» Responce time < 300ms
» Real time alert at high temperature
» Double WDR-camera for detection of humans and differnt face shapes.

» Supports 22000 registered users and 100000 storage records
» Can be supervised in real time thru PC/Notebook
» Good picture quality and qualitative components for a long life time.
